

**NOTICE OF PUBLIC COMMENT PERIOD AND PUBLIC MEETING  
HAZARDOUS WASTE TREATMENT AND STORAGE FACILITY  
CLASS 2 INTERIM STATUS DOCUMENT (ISD) MODIFICATION  
INDUSTRIAL SERVICE OIL COMPANY, INC.  
1700 South Soto Street, Los Angeles, California, 90023**

**PUBLIC COMMENT PERIOD:** February 13, 2005 to April 16, 2005  
**PUBLIC MEETING:** March 19, 2005 at 11:00 a.m.

**LOCATION:** Robert Louis Stevenson Branch Library  
803 Spence Street  
Los Angeles, CA 90023  
(323) 268-4710

**WHAT'S BEING PROPOSED?**

The California Department of Toxic Substances Control (DTSC) invites public comments and provides opportunities for public participation during the 60-day public comment period on the Hazardous Waste Storage Facility Class 2 Interim Status Document (ISD) Modification (Modification). If approved by the DTSC, the Modification will allow Industrial Service Oil Company, Inc. (ISOCI) to use its existing Series 100 product oil storage tanks for treated used oil storage, while approval of a RCRA Hazardous Waste Facility Part B permit is pending for treatment and storage activities at the **ISOCI facility, located at 1700 South Soto Street, Los Angeles, CA, 90023**. In addition, ISOCI requests temporary authorization for 180 days to immediately implement these changes pending approval of the Modification.

The ISOCI facility (EPA I.D. No. CAD099452708) operates as a used oil and spent antifreeze treatment and storage facility, in accordance with an ISD granted by the DTSC on May 23, 1986. The ISOCI facility is currently authorized to store up to 350,000 gallons of waste liquids, of which 15,000 gallons may be spent antifreeze. The ISOCI facility has seven Series 100 oil storage tanks (each with an operating capacity of 67,641 gallons) of which one is currently authorized for storage of treated oil pending certification as recycled oil product, per California Health and Safety Code, section 25250.1. The seven oil storage tanks are within a tank containment system that meets federal and California secondary containment requirements. Per California Health and Safety Code, section 25250.1, recycled oil must be laboratory tested to meet acceptable standards before being certified as recycled oil product. Based on operational and safety concerns, the ISOCI facility desires to obtain DTSC authorization for the use of all seven oil storage tanks, with a combined operating storage capacity of 473,487 gallons, for the storage of treated oil pending certification.

ISOCI is notifying the public of this Modification in accordance with Title 22, CCR, section 66270.42(e)(2)(C). Implementation of the requested Modification will be carried out after receiving written approval from DTSC. DTSC will prepare all documents associated with this Modification request as required by the California Environmental Quality Act (CEQA).

**WHY THIS NOTICE?**

This notice is to provide to interested public an opportunity to learn about the project and provide comments to DTSC by April 16, 2005 on the proposed use of the seven Series 100 storage tanks for treated oil pending certification as recycled oil product.

**HOW DO I PARTICIPATE?**

Your participation is encouraged. A public meeting will be held at 11:00 p.m. on March 19, 2005 at the Robert Louis Stevenson Branch Library at 803 Spence Street, Los Angeles, CA, 90023 to explain the details of the requested Modification. **You can make your comments at the meeting or submit written comments concerning the Class 2 ISD Modification to Mr. Steve Rounds, DTSC Project Manager, at 1011 North Grandview Avenue, Glendale, CA, 91201. Written comments must be postmarked by April 16, 2005.**

The public comment period starts on February 13, 2005 and ends on April 16, 2005. At the close of the comment period, the DTSC will respond in writing to those who have submitted comments with name and address, consider all comments, and make a final decision on the Class II Hazardous Waste Treatment and Storage Facility ISD Modification. The public

repositories will contain the Record of the Decision, the Comments received and Response to Comments. Everyone who provides written comments and/or signs in at the public meeting will be notified of the decision.

#### **WHERE DO I GET MORE INFORMATION?**

A copy of the Authorization request and related project documents will available at the Robert Louis Stevenson Branch Library at 803 Spence Street, Los Angeles, CA 90023, Phone number: (323) 268-4710. These documents have been placed under ISOC's name at the library reference desk. Additionally, the Modification request, the ISOC interim status permit compliance history during the life of the permit being modified, and the full Administrative Record pertaining to this project are available for review during office hours at the DTSC Regional Records Office, located at 1011 North Grandview Avenue, Glendale, California. Please contact Ms. Jone Barrio at (818) 551-2886 for an appointment.

#### **CONTACT:**

Please direct any questions to Mrs. Maya Akula, DTSC Public Participation Specialist, at (818) 551-2917, Mr. Steven Rounds, DTSC Project Manager, at (818) 551-2188, or Mr. Pete Kotoff, ISOC Facility Plant Manager, at (562) 598-5577.

#### **HEARING IMPAIRED:**

Please contact the State Relay Service at 1-888-877-5378 (TDD) and ask for Mrs. Maya Akula, DTSC Public Participation Specialist at (818) 551-2917 (ISOC Project).
